

# ILPTH REPORT GUIDE

## Types of data reports available

Below are the available report options in ILPTH. Please not access to these reports is restricted based on organizational role. If you do not have access, you can request a copy of the reports using the following link: <https://forms.office.com/r/fK7ebGNDdn>

### Class Data Report

- Detailed report on classes, participants and completers.
- This report does not contain HIPAA protected information.
- Accessible exclusively to Provider Relationship Managers. If unable to access, fill out the Data Request Form at the following link: <https://forms.office.com/r/fK7ebGNDdn>
- Provides insights into the number of workshops conducted, along with participant and completer numbers, completer rate, and workshop status.
- For more details, please refer to pages 2-3.

### Participant Detail Report

- Comprehensive report covering host organization and site details, leader names, participant data and workshop-specific information.
- The raw data report contains sensitive HIPAA protected information and will be de-identified.
- Access is restricted to AgeOptions staff only. If unable to access, fill out the Data Request Form at the following link: <https://forms.office.com/r/fK7ebGNDdn>
- Includes participant pre- and post-survey responses, as well as workshop attendance data.
- For further details, please refer to pages 4-5.

### Class Leader Report

- View classes facilitated by leaders within your organization, along with detailed information about leader certification.
- Accessible to Provider Contacts and Leaders. Providers can view all leaders under their organization, while leaders can view their own leader information.
- Includes leader contact details, certifications, type and expiration dates, the last class led, and the date of fidelity checks.
- For more details, please refer to page 6.

# CLASS DATA REPORT

Use the class data report to find workshop level data.

## EXPORT A CUSTOM REPORT

*Filter by date range, program, workshops paid or unpaid, etc.*

*(Accessible to Provider Relationship Managers)*

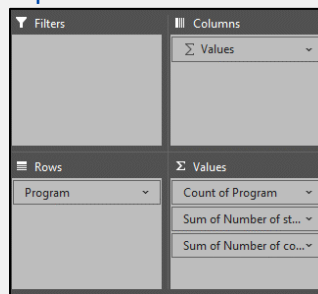

- **Step 1:** Navigate to the ILPTH Website and sign in to the dashboard using the link in the upper right-hand corner ([ilpathwaystohealth.org](http://ilpathwaystohealth.org)).
- **Step 2:** Click on the “Reports” option in the left navigation panel.
- **Step 3:** Click “Class Data Report.” If you do not have access to the report in ILPTH and need a copy, complete the Data Request Form at the following link: <https://forms.office.com/r/fK7ebGNDdn>
- **Step 4:** Use the filtering options as needed, then export the file (it will be saved in your downloads).
- **Step 5:** Open the Class Data Report to view it and apply additional filter as needed.

## CREATE CUSTOM TABLES

*Create a pivot table to display info*

*(Ex. Workshops conducted, participant & completer counts)*

- **Step 1:** Export the report using the steps outlined above.
- **Step 2:** Open the Excel file and add a filter to the top row header. Filter out and remove any unnecessary rows, as Excel will display all data in pivot table rather than just the filtered data.
- **Step 3:** Create a pivot table by clicking “Insert” and selecting “Recommended PivotTables.” Choose an option from the left and click “OK.” Adjust the pivot table fields as follows:

- **Step 4:** The pivot table will appear on a new sheet.

Row Labels	Count of Program	Sum of Number of starters	Sum of Number of completers
A Matter of Balance	1	11	9
Bingocize®	4	74	40
Tai Chi for Arthritis and Fall Prevention	2	22	0
<b>Grand Total</b>	<b>7</b>	<b>107</b>	<b>49</b>

**Pivot Tables: Use the pivot table feature to create different tables.**

- Total workshops conducted
- Participant and completer counts
- Completer rate
- Review workshop status (i.e. Number of cancelations vs. completions)

*You can also create custom charts using data from the Class Data Report.*

*Examples of tables and charts that can be created are displayed on the next page.*

# PARTICIPANT DETAIL REPORT

Use the participant detail report to access participant pre- and post-survey responses, as well as workshop participant attendance. Advanced Excel skills (beyond the scope of this tutorial) are required to generate tables and charts for in-depth data analysis.

## VIEW & ANALYZE PARTICIPANT LEVEL DATA

*Design tables & charts for comparing pre- and post-survey data*

- **Step 1:** Request a de-identified participant data report by completing the Data Request Form at the following link: <https://forms.office.com/r/fk7ebGNDdn>
- **Step 2:** Once you receive the report, open the Excel file.
- **Step 3:** Be aware that duplicate columns may appear in the report, as participant demographic data is included in both the “Participant Info” and the “Pre-Survey” sections. Additionally, you may encounter duplicate pre- or post-survey questions from older survey versions. Use Excel formulas to merge any duplicate columns.
- **Step 4:** Analyze the demographic data using pivot tables. Apply data analysis skills to create tables and/or charts for comparing pre- and post-survey results.

## Data Analysis: Create tables and/or charts to analyze data

- Compare participants by gender, race or education level.
- Analyze reported health conditions
- Contrast Pre- and Post-Survey data
- Examine Post-Survey outcome data

*Examples of tables and charts that can be created are displayed on the next page.*
